PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate majoring in Database Systems, with hands-on experience in web application development through internship work and personal projects. Experienced with PHP, Laravel, MySQL/MariaDB, JavaScript, and Git/GitHub. Familiar with Laravel MVC, CRUD operations, relational database design, application testing, and debugging. Seeking a Junior Web Developer opportunity to contribute to reliable, user-friendly web applications while continuing to grow technical skills.

EDUCATION

Mindanao State University – Zamboanga Sibugay | Zamboanga Sibugay, Philippines
Bachelor of Science in Information Technology, Major in Database Systems
Graduated: 2026

EXPERIENCE

IT Intern / On-the-Job Trainee (OJT) | Emergence Systems & Solutions
February 2026 – May 2026

- Participated in the development and improvement of web-based information systems.
- Developed and maintained Laravel applications using PHP and MySQL/MariaDB.
- Designed and managed relational database structures for web applications.
- Assisted with CRUD operations, authentication, dashboards, and other application features.
- Used Git/GitHub for source-code management and version control.
- Performed application testing, debugging, and basic troubleshooting.
- Applied database normalization and relational database concepts in practical tasks.

PROJECTS

Laundry Management System | Laravel, PHP, MySQL/MariaDB, Blade, Tailwind CSS, JavaScript

- Developed a web-based system to manage laundry operations and records.
- Designed relational database structures for customers, transactions, services, and related records.
- Implemented CRUD functionality, authentication, and database-driven workflows.

Task Management System | Laravel, PHP, MySQL/MariaDB, JavaScript

- Developed a web application for creating, updating, tracking, and managing tasks.
- Designed database relationships for users and task records using Laravel MVC and relational database principles.

Cybersecurity & Network Analysis Practice | Linux/Ubuntu, Wireshark, Nmap

- Practiced basic network reconnaissance and port/service identification in authorized environments.
- Used Wireshark to observe basic network packets and protocols, and practiced recognizing unusual activity.
- Used Linux/Ubuntu command-line tools for basic system and network troubleshooting.
- Practiced reviewing sample authentication and system logs; studied access control and system hardening fundamentals.

TECHNICAL SKILLS

Programming & Web: PHP, Laravel, HTML, CSS, JavaScript, Blade, Tailwind CSS, Vite

Databases: MySQL, MariaDB, SQL, phpMyAdmin, relational database design, database normalization

Tools & Development: Git, GitHub, VS Code, XAMPP, Composer, npm

Cybersecurity & Networking: Linux/Ubuntu, TCP/IP fundamentals, DNS, SSH fundamentals, basic network troubleshooting, Wireshark (basic packet analysis), Nmap (basic network and port scanning), basic security log analysis

Security Concepts: Authentication and access control, least privilege, multi-factor authentication (MFA), basic system security and hardening, common cybersecurity threats and practices

Professional Skills: Problem solving, analytical thinking, attention to detail, troubleshooting, adaptability, teamwork, communication, willingness to learn

CYBERSECURITY LEARNING

Continuously building foundational knowledge through hands-on practice and self-directed learning in Linux/Ubuntu, networking and TCP/IP, network security fundamentals, Wireshark packet analysis, Nmap fundamentals, basic security log analysis, authentication and access control, system hardening, and common cybersecurity threats and security practices.
